Synopsis:

A teddy bear guides you through some National Parks. There are questions for you to answer about the parks, places for your photos/postcards and park stamps. Although all parks are not discussed by Teddy they are all on a checklist. You can use the checklist to mark which parks you have been to. I liked the parks that I visited. The book had nice information about them. There is a web site you can visit:

www.teddytravels.com. I would recommend this book because it is a good family thing for a family to do together. The kids would like doing it together. 💕
